### About Me

Creative Proficient full-stack developer skilled in creating user-centric, responsive web apps. Experienced in front-end (HTML, CSS, JS, Vue) and back-end (Laravel, Node, Mysql, MongoDB) technologies. Collaborates cross-functionally to deliver quality solutions while staying up-to-date with the latest web development tools and practices.

### Projects

#### Data Science Website (Python-Streamlit)

- A task management app which can improve users' productivity and keep them focused on their goals they wanna achieve with funny and appealing interfaces.

#### Public Works & Roads Office (Flutter)

- Developed a local licensing application using Flutter to streamline permit management for the public works office.

#### OsoolTrust Web & Mobile App (Laravel & VueJs)

For the graduation project, developed a comprehensive web-based asset management platform with features like asset tracking, inventory management, vendor management, and reporting/analytics.

#### E-commerce Website (Laravel & Mysql)

E-commerce enables online sales with secure customer experience. Businesses can reach a wider audience and sell their products through these platforms

Note : Some projects were mentioned, not all were shown.
